PURPOSE

This Master Closeout Report provides a consolidated record of all activities performed throughout the Disaster Recovery (DR) Drill lifecycle. The report incorporates historical lifecycle phases as appendices, providing complete traceability.

SCOPE & COMPLIANCE EVIDENCE MAPPING MATRIX

COMPLIANCE EVIDENCE MAPPING	OPERATION PHASE	TARGET AUDIT SCOPE REQUIREMENT
Appendix A	Pre-Drill Baseline Check	Pre-drill NSLOOKUP verification current DNS A records with Prod IP.
Appendix B	Failover Execution	Execute failover DR Drill after dry-run validation to change DNS records from Production IP to DR IP addresses.
Appendix C	Post-Failover Verification	Perform live post-change NSLOOKUP validations to confirm active routing to DR Zone.
Appendix D	Rollback Restoration	Rollback: Execute reversion of records back to original primary production IPs.
Appendix E	Post-Rollback Verification	Final verification of restored environment to prove 100% successful reconciliation back to Production state.
