DR DRILL CLOSEOUT REPORT

FAILOVER VALIDATION, ROLLBACK VERIFICATION, AND KEY OUTCOMES

RESULT SUMMARY DASHBOARD

PASS / RECOVERED 23	FAILURES 2	SKIPPED / UNKNOWN 0	SUCCESS RATE 92%
------------------------	---------------	------------------------	---------------------

PURPOSE

This Master Closeout Report provides a consolidated record of all activities performed throughout the Disaster Recovery (DR) Drill lifecycle. The report incorporates five historical lifecycle phases as appendices, providing complete traceability.

SCOPE

Consolidated review of all infrastructure phases:

- Pre-Drill DNS Verification
- Failover Execution (From Production to DR)
- Post Failover DNS Verification,
- Rollback Execution (from DR to Production)
- Post-Rollback DNS Verification.

CHANGE SUMMARY

All state transitions and configuration changes were validated against recorded execution logs and verification checkpoints. Activities were performed in accordance with approved DR procedures, ensuring that each transition occurred under verified conditions and that infrastructure services were successfully restored to their intended operational state.

Conclusion: The end-to-end operational lifecycle of the Disaster Recovery (DR) Drill has been successfully concluded. Validation and reconciliation performed across baseline discovery, failover execution, and primary site rollback confirm the infrastructure has been restored to its intended operational state.
