------------------------	---------------	------------------------	---------------------

PURPOSE

This report documents the results of DNS Lookup of all the hosts which planned for DR mbaseline verification activities performed prior to the Disaster Recovery (DR) Drill. The objective was to check and establish an unalterable pre-drill baseline of core infrastructure DNS A records.

SCOPE

- Verification of DNS A records listed in the approved DR Drill scope.
- Validation of DNS resolution from the designated verification DNS server.

CHANGE SUMMARY

- DNS A records were reviewed against the approved DR Drill inventory.
- Post-change DNS resolution validation was performed for all in-scope records to establish a clear baseline.
